## ASSEMBLY HARDWARE

**A.** Standee
B. Easel
C. Hook-and-loop tabs

ASSEMBLY

1. The standee ships folded in half with the frame around it for safety.

2. Unfold the standee and carefully remove the perforated frame surrounding it.

3. Carefully unfold the easel.

4. Gently fold the creases on the easel.

5. Depending on the standee size there will be 1 or 2 supports. Fold the support down until they are secure.

6. With the support(s) locked in place, the easel will stand on its own.

ASSEMBLY

7. Peel the plastic off the back of the hook-and-loop connectors.

8. Attach the hook-and-loop connectors to the easel. Space the connectors evenly apart to provide the best stability.

9. Once all the hook-and-loop connectors are in place, remove the plastic from the other side of the connector.

10. Line the easel with the standee. The bottom of the easel should be flush with the bottom of the standee. Gently push the easel to the standee and make sure the easel is secure.

11. Stand up the standee with the easel attached. The standee should sit flat

12. The standee is now ready to use.

*Disclaimer: Recommended for indoor use or outdoor areas with no wind. Windy conditions will cause the cardboard cutout to topple over.
